BIS[™] *High Efficiency EPA-Certified*
Fireplace Design Collection

As beautiful as they are practical, the entire line of high-efficiency wood-burning fireplaces from the BIS collection builds on years of experience in design and functionality.

From an elegant, traditional favorite to a sleek, contemporary attraction, a BIS collection fireplace creates an instant focal point — a centerpiece admired and treasured for its beauty as well as its performance. Every high-efficiency wood-burning fireplace from the BIS collection is EPA-certified, which means that you can count on dependable warmth with the added bonus of responsible burning.

Embrace the intimate atmosphere of a BIS collection fireplace.

Evo

Heat multiple rooms with the *forced air heating kit*.

Warm air can be directed up to 50 feet away to heat up to three additional rooms. And heat can be thermostatically controlled to cycle- just like your furnace.

So while you are enjoying couple time in front of the living room fireplace...

she is just as cozy reading in the upstairs bedroom.

Evolution of the

BIS

In the early 80's the controlled combustion wood stove was a new phenomenon experiencing unprecedented demand- so much so that manufacturers struggled to keep up. Consumer acceptance was at an all time high for wood-burning as they strived to reduce home heating costs and became more independent from conventional heating systems.

As consumers visited retail showrooms they wanted all the features of the new wood stove technology but many expressed the desire to have it as a built-in fireplace... something that was not available at the time.

Recognizing the market demand we introduced the first BIS in 1984. BIS simply stood for "BUILT-IN STOVE." There was one model and three door finishes. With the development of the BIS, a new high-efficiency fireplace category was born and became the fastest growing fireplace category by percentage.

BIS continued to evolve with additional models, a variety of sizes and more options. Efficiencies were improved and to assist in heating other rooms we developed gravity kits. The *Forced Air Heating Kit* will allow you move heat and enjoy the warmth in up to three other rooms.

30 years after creating the high-efficiency (EPA) fireplace category we continue to be the market leader today... offering a size to fit your need, limitless décor possibilities, high quality manufacturing, and total flexibility to heat additional living areas of your home.

I am in my 40th year in the Hearth Industry and am proud to have been involved with the BIS collection in its first 30 years on the market. In my mind there is no finer wood-burning fireplace available today. It has stood the test of time. I invite you to review this catalogue to see the full line and features- you will find it is second to none.

FEATURED Brentwood LV shown with White Stacked Smooth panels and Square Pane door. See page 17 for more details.

START SOMETHING BEAUTIFUL

Sacrificing *style for warmth*
is a thing of the past.

Montecito Estate with White Stacked Textured panels, Hammered-Steel facade and doors.

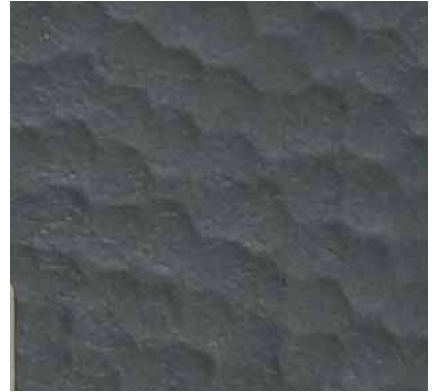

BIS[™]

MONTECITO ESTATE

At 4.0 cubic feet, the Montecito Estate is one of the largest fireboxes in its class. Double doors and an embellished facade highlight its large glass viewing area while the time-delayed air boost system ensures fast and easy ignition.

Choose your doors and facade.

Montecito with White Stacked Textured panels, Smooth facade and Arched Steel door.

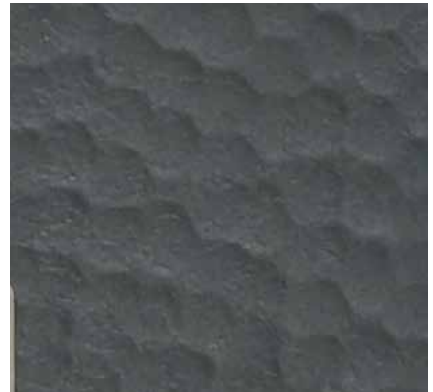

MONTECITO

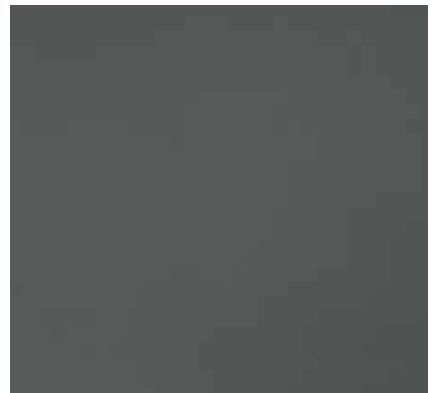

The Montecito contains impeccable style options just like it's larger predecessor, the Montecito Estate. A dressed up facade, a heavyweight door that lends an excellent view of the fire and an air boost system that allows for easy startup.

Choose your doors and facade.

Brentwood LV shown with Square Pane door.

BRENTWOOD LV

Square pane doors with a slim modern handle and contemporary andirons set the Brentwood LV apart from the rest. For a more traditional look, louvers paired with white paneled bricks and a decorative cast iron log retainer will win you over.

IT'S ALL IN THE DETAILS.

Square Pane doors and White Stacked Smooth panels come standard.

INTERIOR (STANDARD)

White Stacked Textured Panels

Ladera fireplace with White Stacked Textured panels and Decorative Keystone Surround Kit.

LADERA

The modest size of the Ladera is amplified by your choice of two sophisticated surrounds. Select the modern styling of the cast iron surround or the art deco inspired keystone surround for a more classic look.
