Connection  
With the  
Combination  
Fireplace

# The Combination Fireplace Design is The *Only* Practical Fireplace Design For Earthquake Seismic Zone 2, Zone 3, and Zone 4

Lightweight Class-A Metal Packed Pipe Chimney System

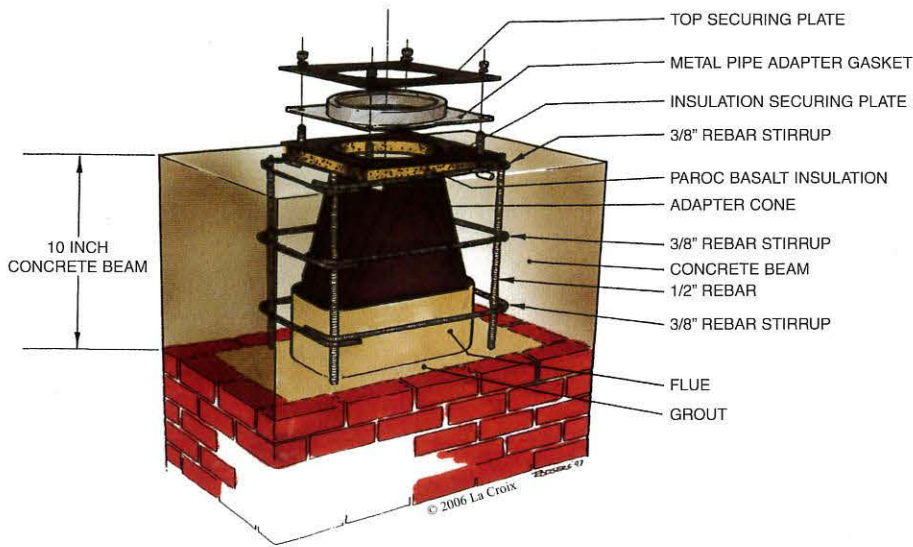

## The Lightweight Class-A Metal Packed Pipe Chimney System

The lightweight Class-A packed pipe chimney system when enclosed in wood or metal chase offers a weight savings of 245 pounds per vertical foot over a full masonry chimney.

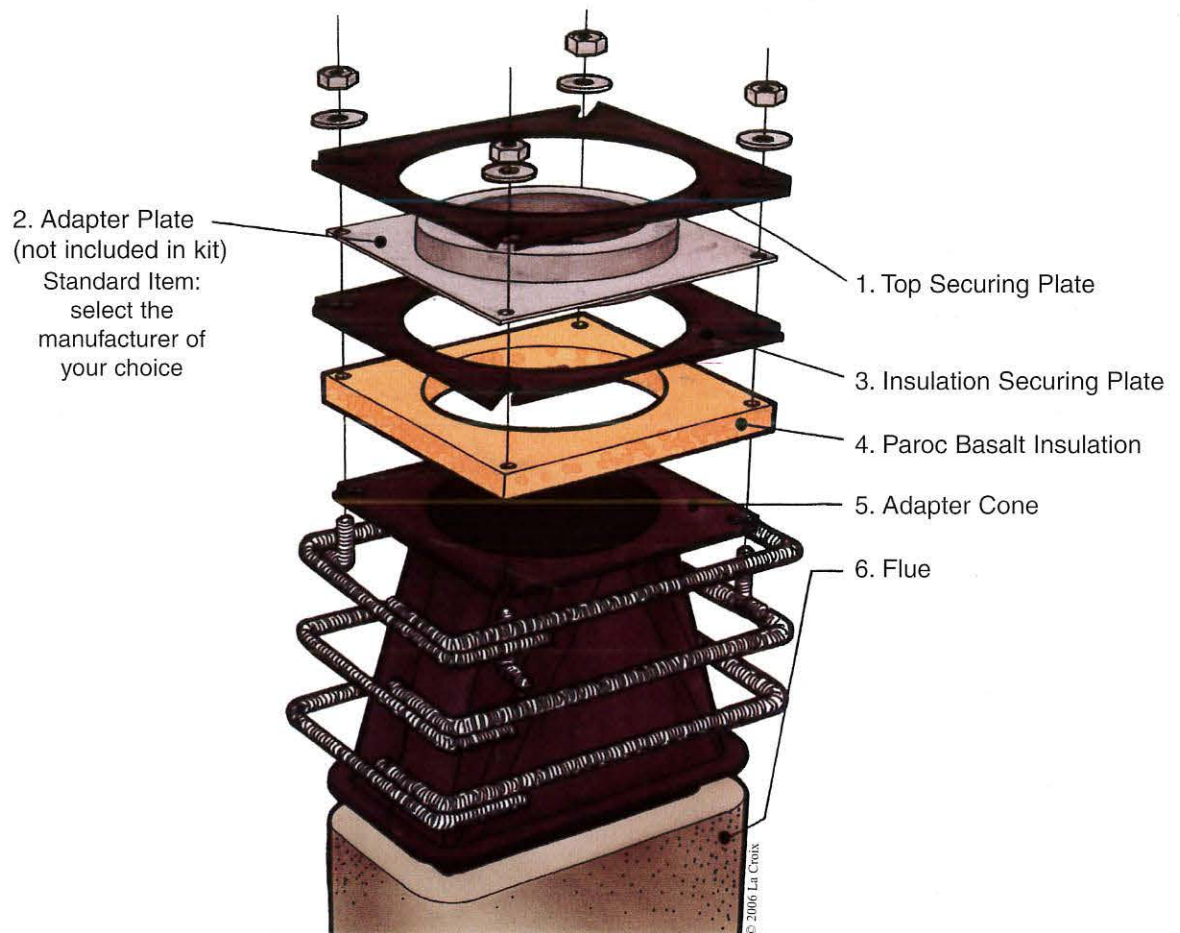

**The Masonry Base**  
The concrete foundation anchorage combined with the masonry firebox offers safety through strength and durability.

# The LC-Adapter Kit

The unique design of the LC-Adapter Kit allows for the transformation from an oval masonry flue to the round shape of the Class-A metal packed pipe chimney system in eight inches.

The LC-Adapter Kit is offered in four standard sizes that balance the size of the oval masonry flue to the round Class-A metal packed pipe.

1. 36 inch masonry firebox = 10 inch LC-Adapter Kit
2. 40 inch masonry firebox = 12 inch LC-Adapter Kit
3. 48 inch masonry firebox = 14 inch LC-Adapter Kit
4. 60 inch masonry firebox = 16 inch LC-Adapter Kit
