Fireplace Cleaner
Removes Smoke & Soot Stains

Your Smoke Stained Fireplace Can Look New Again

The “Dirt” On Fireplaces

Everyone loves the warmth of a roaring fire, but few like the dark, dingy, look of a smoke and soot stained fireplace front.

Smoke, soot and ash occasionally seep from fireplaces and woodstoves during normal use. Over time, these tiny, black carbon-based particles embed into the pores and surface of the masonry surrounding your fireplace. Because these stains happen gradually over time through a process known as “ghosting,” you may not even realize how different your fireplace currently looks compared to when it was new.

These stains are very difficult to remove and require the use of harsh chemicals that you don’t want in your home, not to mention the time and mess involved. Even then, these unsightly stains are nearly impossible to remove from porous surfaces such as brick and stone, until now...

Your Fireplace Can Look New Again

ChimneySaver Paint “N” Peel Fireplace Cleaner is a revolutionary new kind of cleaner that represents a major breakthrough in the removal of smoke and soot stains from fireplace fronts and hearths. It’s applied like a thick coat of paint, and as it dries, its wicking action draws out and removes deeply embedded stains.

- **Restores the Appearance of Your Fireplace**
- **Environmentally Friendly**
- **No Noxious Odors**
- **Interior/Exterior Use**

Your Fireplace Front, Expertly Cleaned Without The Hassle

ChimneySaver Paint “N” Peel Fireplace Cleaner is a safe, effective way to clean your fireplace front. Your hearth professional has the proper tools and experience to apply the product correctly, which in simple terms, is painted over the stained areas. The product dries to a thick, rubbery, non-hazardous film in 6-12 hours. When completely dry, it is easily peeled away from the surface and discarded. Paint “N” Peel Fireplace Cleaner saves you time and eliminates the hassle of cleaning your smoke/soot stained fireplace.

Before Cleaning

Now Relax And Enjoy Your Fireplace

Sit back and enjoy your next roaring fire without the distraction of those dark, dingy smoke and soot stains on your fireplace.
