POWER VENTING

# External Wall Mount Power Vent

The external wall mount Power Vent System is a draft assisted system designed to accommodate extended horizontal exit direct vent installations. Where conventional direct vent systems are not possible, this venting system connects with Montigo's 4"/7" direct vent components, and is for use with a Montigo gas fireplace equipped with electronic ignition.

**MUST ORDER:** **A** Power vent, **B** Power cord, **C** Purge control, **D** Speed control

# Flush Louvered Inline Power Vent - 200

When external vents are not permitted, the PVHIN47-200 and TMHIN47 make the install of residential fireplaces possible. The flush termination allows for installation into combustible materials, concrete or curtain wall materials with ease. The termination is stainless steel for a long corrosion free life. This termination comes complete with the exterior louvers, which can be installed separately once the building construction is completed. The power head contains a brushless motor design and incorporates a built-in dilution system to allow vent speed reduction for smaller appliances without jeopardizing the motor's operational temperatures.

# Wall Mount Power Vent - 300

A power vent that re-defines how an external power vent can perform without compromising the aesthetics of your building. This power head uses the best fan technology for years of reliable service. The PVHEX58-300 design minimizes the visual impact by using a side intake - bottom exit to eliminate the previous louvered look. As well, the 300cfm capacity is large enough to handle high BTU residential fireplaces and uses standard 5"/8" or 5"/10" venting. Brushed stainless steel construction assures corrosion free life and a modern look.

# Flush Louvered Power Vent - 300

This power head uses the best fan technology for years of reliable service. The PVHFL58-300 design minimizes the visual impact by mounting flush with the side of the building. The 300 cfm capacity is suited for high BTU residential fireplaces and uses standard 5"/8" or 5"/10" venting. Servicing of this product can be performed both from the outside or inside [provided access is available] of the building. This is ideal for multi-unit buildings where the installation may be a distance from the ground. Brushed stainless steel construction assures corrosion free life and a modern look.
